Languages Native fluency in Spanish; Conversational Proficiency in English (B2)

Workflow Tools Github, Figma, Trello, Notion, Slack, Zoom

Interests Technology and Sustainability

WORK EXPERIENCE

Chimboteros

Frontend Developer

Chimbote, Peru (Jan 2021 - Feb 2023)

- Collaborated with a team to develop and maintain the organization's websites and main web application
- Facilitated the recruitment of developers for a tourism web platform by conducting interviews and assessing technical skills
- Implemented Scrum workflows and optimized the development process using GitHub flow to boost team productivity
- Developed multiple landing pages to assist in the recruitment of a multi-talented and cross-functional team for all areas of the organization

COMMERCIAL AND PERSONAL PROJECTS

Culturalismo

- Implemented server-side rendering (SSR) using [Next.js](#) to improve the performance, user experience, and SEO of the application when delivering content from our preferred CMS, [Sanity.io](#)
- Configured the project structure and workflow to prioritize scalability and maintainability by following clean architecture principles
- Implemented unit tests with Jest and React Testing Library to ensure proper functionality of complex features, including the modal gallery and the comment section

Corteza

- Leveraged the large amount of data from the Google Books API to create a custom book search engine
- Designed and developed forms to enable users to edit incomplete book metadata retrieved from the Google Books API to improve their book tracking
- Provided users with CRUD capabilities to store data related to their tracked books and leveraged browser technologies such as local storage to persist that data

One Plate

- Utilized the extensive data from the [Spoonacular API](#) to provide accurate data on food ingredients, nutrients, and recipes to users
- Leveraged the [Chart.js](#) library to present relevant data to the user in a visually appealing manner

Donet

- Implemented the required services and technologies for this full-stack application, including database and authentication on the backend, and state management and client-side routing on the frontend
- Developed CRUD operations for boards, templates, and tasks - the three primary features of the app

EDUCATION

Universidad Privada del Norte

Trujillo, Peru (2017 - 2018)

- Studied Administration and International Business (Incomplete)
- Collaborated with fellow students to develop potential commercial products showcased at a university festival
- Volunteered for manual labor, including repairs and cleaning, at a local children's school

Meta Front-End Developer Professional Certificate

Coursera

- Introduction to Front-End Development
- Programming with Javascript
- Version Control
